

HAZARDOUS SUBSTANCE RISK ASSESSMENT

Conduct a Chemical & Hazardous Substance Risk Assessment (approximately 500 substances)

- Identify the hazards and analyse the risks associated with chemicals used in the workplace
- Identify the impact of chemicals on health
- Identify appropriate controls to progressively reduce risk to an acceptable level
- Consideration of maintenance, storage and accidental release

- The Risk Assessment will take account of relevant Health and Safety legislation; including
 - Safety, Health & Welfare at Work Act, 2005
 - Safety, Health & Welfare at Work (General Application) Regulations, 2007
 - Chemical Agents Regulations, 2001
 - Safety, Health & Welfare at Work (Carcinogens) Regulations 2001
 - REACH Regulation 1907/2006/EC

Duration: Half day, approx (depending on requirements of the site)
